

Midterm Exam I Study Guide

Our midterm exam I will be **open book** and **60 minutes**. The following important points are what we covered so far, chapter 1 ~ 5 (lecture 01 ~ 05).

1. Commands grouping to process complicated tasks.
2. How make works?
3. Command substitution
4. Using chmod to change file access permissions.
5. Combine commands to search and pack, compress files for distribution and installation. (e.g. find & tar)
6. Using grep or egrep to search pattern in a file or files.
7. Differences between shell script and C/C++ binary code.
